

SRI LANKAN SCHOOL – MUSCAT

PRINCIPAL'S COMMUNIQUE 24 – (2011/2012)

TEXT BOOKS

Some parents have requested more time to pay for the text books.

Please note that the school will accept the payments from 26th April to 5th May as a second set of payments and place another order with the suppliers.

We will try to get the second set of books also to be delivered before the school closes for the summer vacation but parents should understand that the second order might get delayed due to the delay in placing the order

MEDICINES

The class teachers and the school nurse inform me that some children bring medicine to school and take it in school. I was informed of an incident where a child took three times the prescribed dose and was drowsy the whole day.

There were occasions where children have brought prescription drugs to school which can be harmful if taken incorrectly.

Please note that all medicines that are sent to school should be handed over to the nursing sister along with the prescribed instructions of a Doctor. It is treated as an offence to keep medicines with children.

PERSONAL CLEANLINESS

I am very pleased to inform you that the personal cleanliness of students has vastly improved since my last Communiqué on the subject. I wish to thank the parents for that and make a further request today.

We are training the students to use the dustbins to dispose of garbage. Despite our efforts, it is a losing battle with certain children. I am disappointed to note that such children make no effort to follow instructions in this regard and at times defy instructions by littering purposely.

I earnestly request parents to lead by example and insist that the children use dustbins and not litter the environment when they are out of school. Additionally, instill on the children the good practice of disposing of garbage in an acceptable manner protecting environment we live in.

Somabandhu Kodikara
